

**TEMPORARY
ROAD SIGNS**

ABOUT US

Safety Signs Express is owned and operated by Finnerty Graphics. We are based in Kilrush, Co. Clare and have been trading since 2013.

Safety Signs have always been a big part of our business and in 2021 we launched our user-friendly online store, making it easier for our existing customers to browse our extensive catalogue of safety signs as well providing new customers with access to premium quality products.

OUR TEMPORARY ROAD SIGN RANGE:

- NRA compliant
- Produced using PEG (Prismatic Engineering Grade) class RA1 reflective with printed graphics
- Very high reflective values for improved long distance visibility at night
- Available on 5mm corriboard, 9mm corriboard, rigid black pvc or aluminium composite

Please Note: Roadworks signs are typically placed in environments where they are vulnerable to damage and may have relatively shorter lifespans than permanently fixed signs. With this in mind, and in order to offer the most affordable prices, we typically produce our roadworks signs by printing onto the reflective film and do not use an over laminate. As the graphics are not laminated they are vulnerable to possible scratching and fading over time, however we can produce these signs with more durable, long term print upon request.

WHY CHOOSE US?

Our signs are produced using quality materials, they are printed on the market leading Epson S80600 printer and are finished to the highest standards.

We're not just online; we are always happy to talk to customers, discuss requirements and process orders on the phone or by email. We always aim to offer both a personal and a professional service.

We are a trusted supplier of ESB, Clare County Council, Saint-Gobain and many other businesses locally and nationally.

STANDARD MATERIAL OPTIONS:

5MM CORRIBOARD

Lightweight, corrugated PVC material.

3MM RIGID PVC

Far more robust than standard PVC material but still with some flexibility. Smooth surface, black finish and a very popular choice for roadworks signs.

9MM CORRIBOARD

Far greater durability than the 5mm option and highly recommended for longer term use.

3MM ALUMINIUM COMPOSITE

A smooth, rigid board with a pvc core and a light aluminum skin.

Often referred to as diabond, skybond, etc.

ALSO AVAILABLE:

CLINCH SIGNS

Signs made from aluminium composite or aluminium plate with channel on reverse and supplied with anti-rotational brackets for pole mounting

STOP / GO LOLLIPOP SIGN

RUS 060 / 061

590mm diameter double-sided sign, with 1400mm long 40mm galvanised pole

Sign Frames & Holders

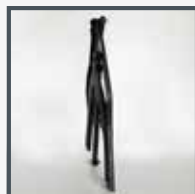

SIGN FRAME SQUARE

- Made from 25mm angle mild steel, painted grey
- Supplied with 4 frame clips
- Lightweight and fold-able
- Rear bar can support sandbags to provide additional weight and stability
- Available in 600x600mm or 750x750mm size
- Compatible with corriboard, rigid pvc or aluminium composite sign panels

SIGN FRAME DIAMOND

- Made from 25mm angle mild steel, painted grey
- Supplied with 4 frame clips
- Lightweight and fold-able
- Rear bar can support sandbags to provide additional weight and stability
- Available in 600x600mm or 750x750mm size
- Compatible with corriboard, rigid pvc or aluminium composite sign panels

ENDURA FRAME

- Made from lightweight but very strong, durable plastic
- Folds and clicks closed for very compact storage
- Base can support sandbags for additional weight and stability
- Locking mechanism allows for easily changing sign inserts
- Can be used for both 600x600mm and 750x750mm signs, and either square, diamond, rectangular or circular shape
- Compatible with corriboard, rigid pvc or aluminium composite sign panels
- Completely recyclable at end of lifespan

CONE STRAP KITS

- 25mm black nylon straps
- Supplied with wide top rivets and washers
- Double set of straps for main message sign or longer single strap for supplementary plate positioned at base of cone
- Compatible with corriboard, rigid pvc or aluminium composite sign panels
- Cost effective

Premium quality safety signs

SafetySignsExpress.ie provides a large range of **ISO compliant** safety signage for construction sites, farms, factories, manufacturing facilities and all types of public spaces. If you can't find what you need in our online store we also have design capabilities to create additional or customised options.

Our safety signs and stickers are printed on vinyl material and laminated to ensure **long term durability**. Signs are available on PVC, corriboard and ACP (aluminium composite panel). We also have an online guide to help you choose the material that best suits your needs.
